RE: Josef Namin
IT Analyst

To Whom It May Concern:

It has been my privilege to work with Josef Namin for the last 2 years.

I didn't know Josef when he joined our EMR team in Kansas City to begin our journey to building and implementing the CERNER EMR system for Central Washington Hospital. I remember being immediately impressed with his knowledge and his ability to answer our questions in a kind, respectful way – even some that our Cerner representative couldn't answer. It was obvious that he had a high level of knowledge about the product we purchased and are now trying to customize for our hospital. I have never seen him be arrogant.

As the Obstetrics Subject Matter Expert, I have worked closely with Josef building OB Powerforms and particularly with building complex rules and a complex formula. He is organized and knowledgeable about what can be done and how to do it and is patient with my requests. If one idea doesn't work, Josef is willing to think of another option to get the job done, even if it takes repeated attempts to get the result we need. I especially appreciate that fact that when I email Josef to ask him about progress or ask if he can help with an urgent problem, Josef responds very quickly.

I have observed Josef as he shares an office with other analysts. He has a very conscientious work ethic, works carefully and is able to concentrate even with others around. I have also observed his flexibility when work stations were re-arranged to help a newer analyst. He is well liked, genuine, a very hard worker and gets along with others well. I have never heard him complain about the difficulty or quantity of work he is given to do.

I am sorry to see Josef complete his contract with CWH. I truly believe that he has made a huge contribution to our EMR and is one of the very best analysts we have had. Any company looking for a quality EMR analyst would be fortunate to have the opportunity to work with Josef.

Very Sincerely,
DeeAnn Schnibbe, RNC
Obstetric Subject Matter Expert
