

I have had the pleasure of working with Josef Namin for 2 years. During this time, Josef has provided a superior level of service to Central Washington Hospital during the design, build and subsequent support of our Cerner Millennium HCIS implementation. Josef has a very strong work ethic and will work through issues until the right solution is achieved for the end user. In addition to his own in depth knowledge of Cerner Millennium, Josef has a strong network of other resources that he skillfully uses to achieve the tasks set before him. I would highly recommend Josef for any Cerner Millennium engagement that he wishes to participate in.
